Attendance Tracker

How to use it — six steps, about a minute.

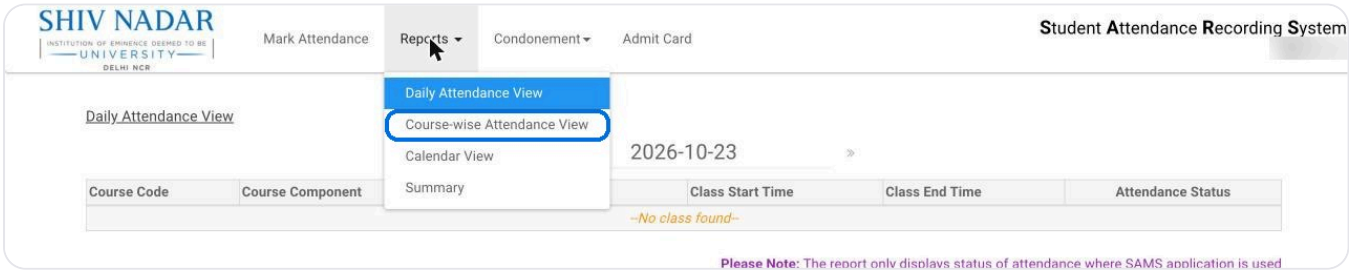

SNU Links → Student Attendance Recording → Reports → Course-wise Attendance View

---

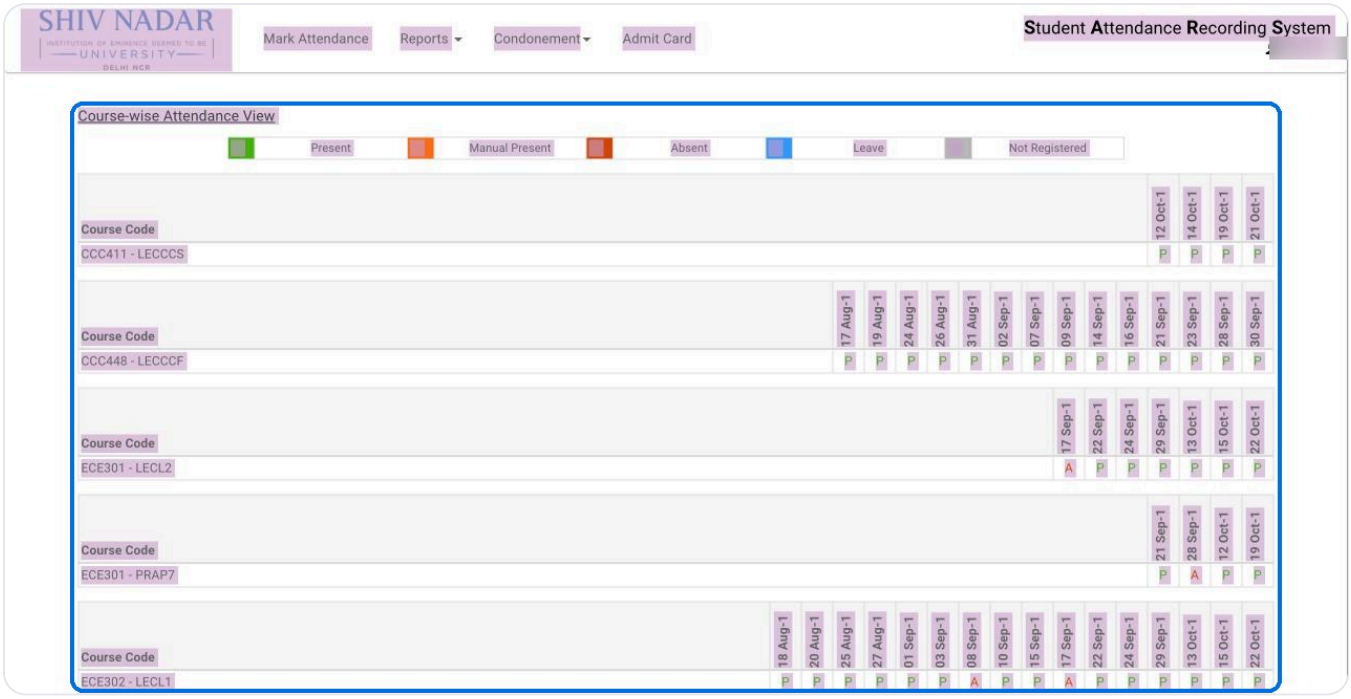

1 Open SNU Links and click Student Attendance Recording.

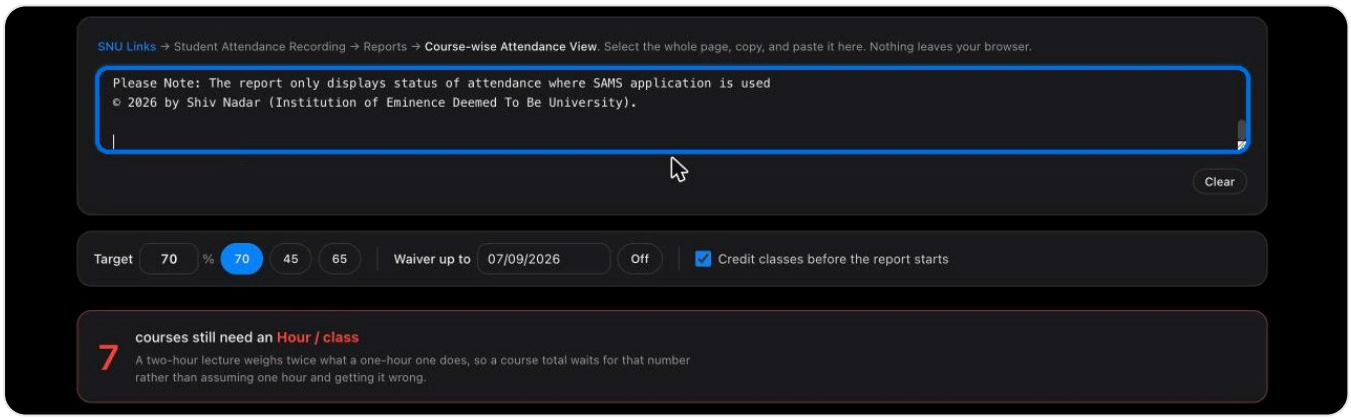

2 Reports → Course-wise Attendance View.

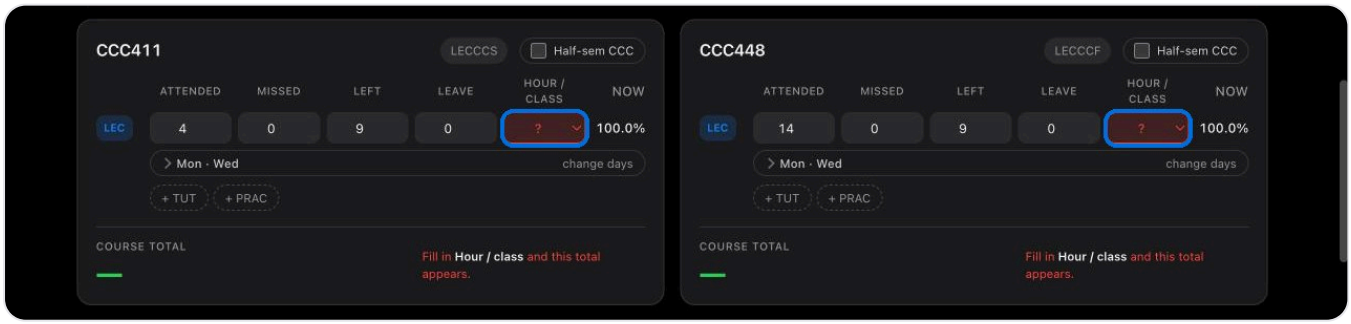

3 Select the whole page (⌘A / Ctrl+A) and copy (⌘C / Ctrl+C).

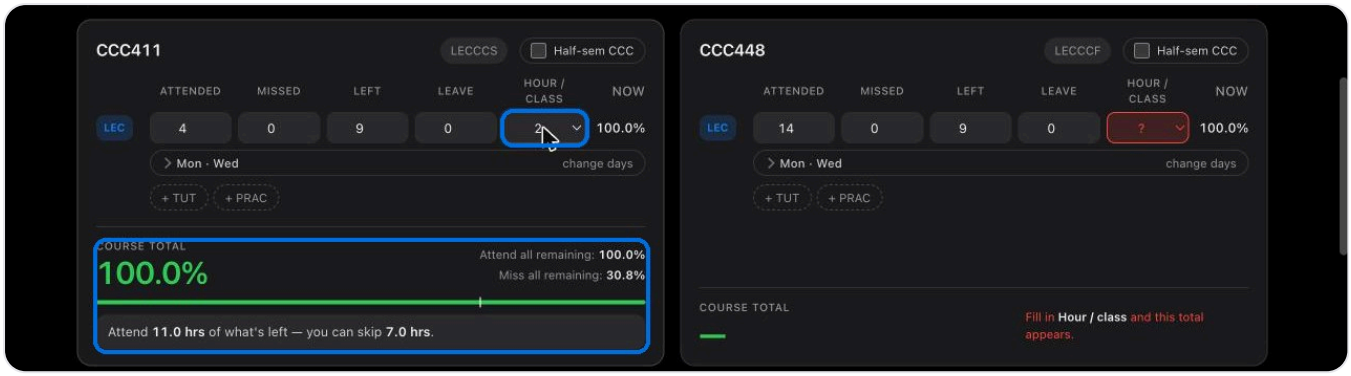

4 Paste it into the tracker. Your courses appear.

5 Set Hour / class for each course — how long one class runs, off your timetable.

6 Read your total, and how many hours you can still skip.

- **Nothing leaves your browser.** The report is read on your device only.
- **Hour / class** starts on "?" — the total waits until you set it. Practicals are always 1 hour.
- **Left** is counted from the academic calendar. Open **change days** if a course meets on different days.
